Class List:

- **09 for** Downloadable Software; AI Software; Computer Hardware; Computer peripherals; Downloadable financial software; Downloadable software for virtual currency, digital currency, digital tokens of value, and cryptocurrency; computer software to enable peer to peer payments using digital currency and digital tokens; computer software platforms for financial and currency exchange; computer software for use in connection with digital currency and cryptocurrency; software for the purchase, sale, trade, payment, clearing, and deposit of tokens of value; computer application software for blockchain based financial platforms; computer software for use in electronically trading, storing, sending, receiving, accepting, and transmitting digital currency and cryptocurrency; computer software and computer hardware for use as a cryptocurrency wallet; computer software for use in managing digital currency payment and exchange transactions; computer software relating to the handling of online and digital financial transactions; digital, virtual and cryptocurrency exchange and trading software; downloadable computer software for managing cryptocurrency transactions using blockchain technology; computer software relating to cryptocurrency, digital and virtual currency; computer programs relating to financial matters; computer software relating to the handling of financial transactions; financial exchange software; currency exchange software; currency trading software; software for e-commerce over a global communications network; Artificial intelligence software; interactive software based on artificial intelligence and machine learning; downloadable computer software using artificial intelligence, machine learning, deep learning, and reinforcement learning for use in financial transactions and financial matters; data mining software; data processing software; downloadable computer software for blockchain technology; software applications; science software; simulation software; sensory software; interactive software; artificial intelligence and machine learning software; artificial intelligence software for healthcare; humanoid robots with artificial intelligence for use in scientific research; laboratory robots; smart glasses; optical glasses; virtual reality hardware and software; wearable computers; electric sensors; cameras; computer software relating to the medical field; software as a medical device (SaMD), downloadable; software for medical, clinical and scientific research; computer software for use in medical surgery; computer software for use in biotechnology; computer software for use in pharmaceutical drug discovery and development; computer software for use in clinical, medical and surgical product development; downloadable computer software using artificial intelligence, machine learning, deep learning, and reinforcement learning for use in medicine, clinical surgery and clinical and medical research; downloadable software for artificial intelligence (AI), machine learning, deep learning, and remote sensing in the fields of robotics; downloadable software for operating robots with artificial intelligence; Downloadable computer software for performing brain-computer-interface, neuroscience, neural engineering, neural prosthetics, thought to text communication, thought to voice communication, speech encoding and decoding, robotic, mobility, mobility equipment, mobility peripherals, motor control encoding and decoding, vision encoding and decoding, hearing encoding and decoding, speech assistant, vision assistant, hearing assistant, thought assistant, smart glasses, and artificial intelligence functions and tasks; Downloadable computer software using artificial intelligence (AI) for performing brain-computer-interface, neuroscience, neural engineering, neural prosthetics, thought to text communication, thought to voice communication, speech encoding and decoding, robotic, mobility, mobility equipment, mobility peripherals, motor control encoding and decoding, vision encoding and decoding, hearing encoding and decoding, speech assistant, vision assistant, hearing assistant, thought assistant, smart glasses, and artificial intelligence functions and tasks; Downloadable software for performing brain-computer-interface, neuroscience, neural engineering, neural prosthetics, thought to text communication, thought to voice communication, speech encoding and decoding, robotic, mobility, mobility equipment, mobility peripherals, motor control encoding and decoding, vision encoding and decoding, hearing encoding and decoding, speech assistant, vision

assistant, hearing assistant, thought assistant, smart glasses, and artificial intelligence functions and tasks; Downloadable open-source computer software for performing brain-computer-interface, neuroscience, neural engineering, neural prosthetics, thought to text communication, thought to voice communication, speech encoding, speech encoding and decoding, robotic, mobility, mobility equipment, mobility peripherals, motor control encoding and decoding, vision encoding and decoding, hearing encoding and decoding, speech assistant, vision assistant, hearing assistant, thought assistant, smart glasses, and artificial intelligence functions and tasks; Downloadable cloud-computer software for performing brain-computer-interface, neuroscience, neural engineering, neural prosthetics, thought to text communication, thought to voice communication, speech encoding and decoding, robotic, mobility, mobility equipment, mobility peripherals, motor control encoding and decoding, vision encoding and decoding, hearing encoding and decoding, speech assistant, vision assistant, hearing assistant, thought assistant, smart glasses, and artificial intelligence functions and tasks; Downloadable software for machine learning for use in robots; Downloadable software using artificial intelligence (AI) for speech recognition for use in robots; Wearable cameras; Wearable activity trackers; Wearable computers in the nature of smart glasses; Wearable computers in the nature of smartwatches; Wearable technological devices being virtual reality headsets; Teaching robots; Telepresence robots; User-programmable humanoid robots, not configured; Virtual reality glasses; Augmented reality glasses; Artificial intelligence software for analysis; Business intelligence software; Machine learning software for analysis; Interactive software based on artificial intelligence; cryptocurrency hardware wallets.

- **10 for** Medical apparatus and devices; surgical, dental, and veterinary apparatus; Medical instruments; surgical robots; prosthetics and artificial implants; hearing aids; medical electrodes; Electrodes for medical purposes; medical implants; robotic prosthetics; Robotic exoskeleton suits for medical purposes; Robotic arms for use by mobility-impaired individuals; Wearable walking assistive robots for medical purposes; Prosthetic intraocular implants; Prosthetic sockets used to fasten prosthetic limbs to the body; Prosthetic limbs, namely, arms, feet, legs; Medical hearing instruments; Assistive listening device for the hearing impaired; Brain pacemakers; Brain-computer interface electrodes for medical use; Brain-computer-interface equipment for medical purposes; Brain-computer-interface equipment for medical purposes, namely, hearing, visual, motor, and speaking assistant devices; Brain-computer-interface equipment with embedded software for medical purposes; Brain-computer-interface equipment with embedded software for medical purposes, namely, hearing, visual, motor, and speaking assistant devices; Corrective glasses; Eye glasses.

- **35 for** Advertising; Business Management; Business Administration; Office Functions; Provision of an online marketplace for buyers and sellers of goods and services; Provision of an online marketplace for buyers and sellers of goods and services, namely, an online marketplace for computing capacity used in artificial intelligence (AI); Provision of an online marketplace for buyers and sellers of goods and services, namely, an online marketplace for renting graphics processing unit (GPU) and central processing unit (CPU) capacity; Business consultancy and advisory services; Collection of data; Data processing; Data transcription; Transcription of communications

- **36 for** Financial services; financial information; cryptocurrency payment processing; Electronic funds transfer; electronic transfer of virtual currency, digital currency, and cryptocurrency; Issuance and redemption of tokens of value in the nature of virtual currency, digital currency, and cryptocurrency; providing financial information via a website; stablecoin payment processing; virtual currency, digital currency, and cryptocurrency exchange services; virtual currency, digital currency, and cryptocurrency financial transactions; financial lending relating to virtual currency, digital currency, and cryptocurrency lending; financial lending relating to virtual currency, digital currency, and cryptocurrency swapping services; virtual currency, digital currency, and cryptocurrency trading services; virtual currency, digital currency, and processing payments for the purchase of goods and services via an electronic communications network; financial grant services; financial investment; financial loan services; financing relating to scientific, clinical and medical research; Investment services; loan services; loans (financing); providing loans and grants for scientific, clinical and medical research; clearing and reconciling financial transactions via a global computer network; currency exchange services; currency trading; currency transfer services; digital currency exchange services; digital currency trading services; digital currency transfer services; digital

token (cryptocurrency) exchange services; digital token financial trading; digital token financial transfer services; electronic financial trading services; Processing payments for the purchase of goods and services via an electronic communications network; financial exchange services, namely, a financial futures exchange for trading currency; financial exchange services, namely, a financial futures exchange for trading digital currency; financial exchange services, namely, a financial futures exchange for trading digital tokens; financial exchange services, namely, a financial futures exchange for trading tokens of value; financial exchange services, namely, a financial futures exchange for trading virtual currency; financial exchange services, namely, providing a financial exchange for trading currency; financial exchange services, namely, providing a financial exchange for trading digital currency; financial exchange services, namely, providing a financial exchange for trading digital tokens; financial exchange services, namely, providing a financial exchange for trading tokens of value; financial exchange services, namely, providing a financial exchange for trading virtual currency; financial services, namely, electronic funds transfer; financial services, namely, facilitating the deposit, holding, and withdrawal of electronic funds; financial services, namely, providing electronic transfer of a digital currency for use by members of an on-line community via a global computer network; financial services, namely, providing electronic transfer of a virtual currency for use by members of an on-line community via a global computer network; financial services, namely, providing electronic transfer of currency for use by members of an on-line community via a global computer network; financial services, namely, providing electronic transfer of digital tokens for use by members of an on-line community via a global computer network; financial services, namely, providing electronic transfer of valuable tokens for use by members of an on-line community via a global computer network; Issuance and redemption of tokens of value in the nature of digital currency for currency; issuance and redemption of tokens of value; issuance and redemption of tokens of value in the nature of virtual currency for currency; issuance of tokens of value in the nature of digital tokens; issuance of tokens of value; on-line real-time currency trading; on-line real-time digital currency trading; on-line real-time digital token financial trading; on-line real-time valuable token financial trading; on-line real-time virtual currency trading; providing information via an internet website in the field of currency exchange services; providing information via an internet website in the field of digital currency exchange services; providing information via an internet website in the field of digital token exchange services; providing information via an internet website in the field of finance; providing information via an internet website in the field of financial transactions; providing information via an internet website in the field of valuable token exchange services; providing information via an internet website in the field of virtual currency exchange services; providing currency futures exchange services for trading currency; providing digital currency futures exchange services for trading digital currency; providing digital token futures exchange services for trading digital tokens; providing information in the field of finance; providing personal loans and lines of credit; providing valuable token futures exchange services for trading tokens of value; providing virtual currency futures exchange services for trading virtual currency; valuable token financial exchange services; valuable token financial trading; valuable token financial transfer services; virtual currency exchange services; virtual currency trading services;; virtual currency transfer services; consultancy relating to financing of energy projects; financial services relating to the creation and issue of financial instruments based on the creation, sale, transmission and processing of electricity or fuels; financial economic analysis and financial evaluation of renewable energy projects; energy commodity trading; Financial consultancy in the energy sector; providing peer to peer financial services namely trading, lending, financing and exchange of digital tokens, valuable tokens, digital currency, and virtual currency via an online financing platform; provision of financial funding and investment of projects relating to energy production, supply and distribution including renewable energy; trading of electricity and gas as financial commodities.

- **38 for** Telecommunications; Audio broadcasting; Audio streaming; Broadcasting programs via a global computer network; Data streaming; Interactive delivery of video over digital networks; Internet broadcasting services; Streaming of audio, visual and audiovisual material via a global computer network; Teleconferencing and video conferencing services; Transfer of data by telecommunication; Transmission of audio content via the Internet; Transmission of digital files; Transmission of messages over electronic media; Transmission of messages via the Internet; Transmission of sound, video and information; Video broadcasting; Video broadcasting via the Internet; Video conferencing services; Video on demand

transmission services; Video-on-demand transmission services provided via the Internet; webcasting services; Wireless broadcasting; Providing access to an online peer-to-peer currency financing platform on the internet; providing access to an online peer-to-peer digital currency financing platform on the internet; providing access to an online peer-to-peer digital token financing platform on the internet; providing access to an online peer-to-peer valuable token financing platform on the internet; providing access to an online peer-to-peer virtual currency financing platform on the internet; providing user access to global computer networks; Broadcasting and transmission of data.

- **40 for** Treatment of Materials; carbon capture; electricity generation; generation of electricity from solar energy; generation of electricity from wind, solar, thermal, geothermal and wave energy; generation of energy from renewable sources; generation of energy via wind farms; generation of gas and electricity; hydrogen powered electricity generation; information, consultancy and advisory services relating to the above; power generation; production of electrical energy from renewable sources; Production of energy; production of gas and electricity; production of hydroelectric power; production of renewable green energy; production of electrical power obtained using geothermal energy systems; services for the treatment of carbon emissions (carbon capture).

- **41 for** Education; Providing of Training; Arranging and conducting of night school courses for adults; Arranging of teaching programs; Computer education training services; Creation [writing of educational content]; Education and training services provided via a digital platform; Education services, namely, providing an educational platform for facilitating and delivery of learning; Education services, namely, providing live and on-line programs, courses, workshops, videos, seminars, forums, conferences, webcasts, podcasts and exhibitions; Educational seminars; Educational testing; Online educational services; Online educational testing; Organization of webinars; Providing information about education; Providing information about online education; Providing online courses of instruction; Providing on-line non-downloadable educational audio content; Providing on-line non-downloadable educational video content; Provision of education courses; Publication of educational teaching materials; teaching academy services; Teaching by correspondence courses; Teaching services; Captioning; Captioning services; Desktop publishing translation services; Interpretation; Interpretation and language interpretation services; Interpretation, interpreter, interpreting, and translation services; Language instruction services; language teaching services; Preparation of captioning and subtitling, and captioning and subtitling services; Subtitling; Subtitling services; Transcreation services, namely, adapting a message from one language to another while preserving the original intent, style, emotion, and tone; Translation; Translation and language translation services; Online training services.

- **42 for** Provision of on-line non-downloadable software; Software as a Service [SaaS]; computer hardware design and development; providing online, non-downloadable software; scientific research; software creation; software design; software development; software research; Science and technology services; advanced product research, design and development in the field of artificial intelligence; artificial intelligence consultancy; biological research, clinical research and medical research; biotechnology research; consultancy in the field of biotechnology; consulting services in the field of software as a service [SaaS]; product design and development of clinical, medical and surgical instruments, tools, apparatus and devices; design and development of computer software for use with medical technology; product design and development of medical implants, chips and prosthetics; designing and developing artificial intelligence, deep learning, machine learning, and reinforcement learning software; development and testing of computing methods, algorithms, computer software, and computer hardware; engineering services relating to robotics; medical research laboratory services; platforms for artificial intelligences as software as a service [SaaS]; product research and development; Providing online non downloadable computer software for use in biotechnology; Providing online non- downloadable computer software for use in clinical, medical and surgical product development; Providing online non-downloadable computer software for use in pharmaceutical drug discovery and development; Providing online non-downloadable computer software relating to the medical field; Providing online non-downloadable online software for artificial intelligence, machine learning, and deep learning; Providing non-downloadable software for medical, clinical and scientific research; providing

temporary use of non-downloadable cloud based software for use in connection with robotics; research and development in the field of biotechnology; research and development services in the field of robots and robotics; research and development services in the fields of artificial intelligence, machine learning, deep learning, and reinforcement learning; research in the field of artificial intelligence; research in the field of artificial intelligence technology; research relating to technology; scientific research for medical purposes; software as a service [SaaS] services featuring software for use in connection with robotics; software as a service [SaaS] services featuring software using artificial intelligence, machine learning, deep learning, and reinforcement learning for use in medicine, clinical surgery and clinical and medical research; technology research in the field of artificial intelligence, machine learning, deep learning, and reinforcement learning for use in medicine, clinical surgery and clinical and medical research; Providing online non-downloadable computer software for using machine learning, artificial intelligence (AI) and large language models (LLMs) for the purpose of data analytics, question-answering systems, problem solving, knowledge retrieval systems, chatbots, personal digital assistants, and intelligent agents; Providing online non-downloadable software that enables users to share and collaboratively develop software, computer code, and user-generated content, in particular open source software; Providing online non-downloadable artificial intelligence software to act as a virtual or personal digital assistant; Providing online non-downloadable software featuring conversational artificial intelligence assistance; Software as a service with computer chatbot software for simulating conversations for use in diagnosing problems, question and answering services, and providing responses; Software as a service with software for using machine learning, artificial intelligence (AI) and large language models (LLMs) for the purpose of data analytics, question-answering systems, problem solving, knowledge retrieval systems, chatbots, personal digital assistants, and intelligent agents; Application service provider [ASP] featuring software using artificial intelligence (AI) for performing biotechnology, brain-computer-interface, neuroscience, neural engineering, neural prosthetics, thought to text communication, thought to voice communication, speech encoding and decoding, robotic, mobility, mobility equipment, mobility peripherals, motor control encoding and decoding, vision encoding and decoding, hearing encoding and decoding, speech assistant, vision assistant, hearing assistant, thought assistant, smart glasses, and artificial intelligence functions and tasks; Artificial intelligence as a service [AIAAS] services featuring software using artificial intelligence (AI) for performing biotechnology, brain-computer-interface, neuroscience, neural engineering, neural prosthetics, thought to text communication, thought to voice communication, speech encoding and decoding, robotic, mobility, mobility equipment, mobility peripherals, motor control encoding and decoding, vision encoding and decoding, hearing encoding and decoding, speech assistant, vision assistant, hearing assistant, thought assistant, smart glasses, and artificial intelligence functions and tasks; Design and development of artificial intelligence (AI) software; Development of new technology for others in the field of biotechnology, brain-computer-interface, neuroscience, neural engineering, neural prosthetics, thought to text communication, thought to voice communication, speech encoding and decoding, robotic, mobility, mobility equipment, mobility peripherals, motor control encoding and decoding, vision encoding and decoding, hearing encoding and decoding, speech assistant, vision assistant, hearing assistant, thought assistant, smart glasses, and artificial intelligence; Neuro artificial intelligence (NeuroAI) scientific research; Neurotech scientific research; Providing an online non-downloadable Internet-based system application featuring technology enabling users to perform biotechnology, brain-computer-interface, neuroscience, neural engineering, neural prosthetics, thought to text communication, thought to voice communication, speech encoding and decoding, robotic, mobility, mobility equipment, mobility peripherals, motor control encoding and decoding, vision encoding and decoding, hearing encoding and decoding, speech assistant, vision assistant, hearing assistant, thought assistant, smart glasses, and artificial intelligence functions and tasks; Providing information relating to computer technology via a website; Providing technology information in the field of biotechnology, brain-computer-interface, neuroscience, neural engineering, neural prosthetics, thought to text communication, thought to voice communication, speech encoding and decoding, robotic, mobility, mobility equipment, mobility peripherals, motor control encoding and decoding, vision encoding and decoding, hearing encoding and decoding, speech assistant, vision assistant, hearing assistant, thought assistant, smart glasses, and artificial intelligence; Providing temporary use of on-line non-downloadable cloud computing software using artificial intelligence (AI) for performing biotechnology, brain-computer-interface, neuroscience, neural engineering, neural prosthetics, thought to text communication, thought to voice communication, speech encoding and decoding, robotic, mobility, mobility

equipment, mobility peripherals, motor control encoding and decoding, vision encoding and decoding, hearing encoding and decoding, speech assistant, vision assistant, hearing assistant, thought assistant, smart glasses, and artificial intelligence functions and tasks; Providing temporary use of on-line non-downloadable open-source software for performing biotechnology, brain-computer-interface, neuroscience, neural engineering, neural prosthetics, thought to text communication, thought to voice communication, speech encoding and decoding, robotic, mobility, mobility equipment, mobility peripherals, motor control encoding and decoding, vision encoding and decoding, hearing encoding and decoding, speech assistant, vision assistant, hearing assistant, thought assistant, smart glasses, and artificial intelligence functions and tasks; Providing temporary use of on-line non-downloadable software and applications using artificial intelligence (AI) for performing biotechnology, brain-computer-interface, neuroscience, neural engineering, neural prosthetics, thought to text communication, thought to voice communication, speech encoding and decoding, robotic, mobility, mobility equipment, mobility peripherals, motor control encoding and decoding, vision encoding and decoding, hearing encoding and decoding, speech assistant, vision assistant, hearing assistant, thought assistant, smart glasses, and artificial intelligence functions and tasks; Providing temporary use of on-line non-downloadable software for accessing, reading, and tracking information in the field of performing biotechnology, brain-computer-interface, neuroscience, neural engineering, neural prosthetics, thought to text communication, thought to voice communication, speech encoding and decoding, robotic, mobility, mobility equipment, mobility peripherals, motor control encoding and decoding, vision encoding and decoding, hearing encoding and decoding, speech assistant, vision assistant, hearing assistant, thought assistant, smart glasses, and artificial intelligence functions and tasks on a blockchain; Research and development in the field of biotechnology.

No: T0004928

Word/Mark:

Class List:

- **09 for** Downloadable Software; AI Software; Computer Hardware; Computer peripherals; Downloadable financial software; Downloadable software for virtual currency, digital currency, digital tokens of value, and cryptocurrency; computer software to enable peer to peer payments using digital currency and digital tokens; computer software platforms for financial and currency exchange; computer software for use in connection with digital currency and cryptocurrency; software for the purchase, sale, trade, payment, clearing, and deposit of tokens of value; computer application software for blockchain based financial platforms; computer software for use in electronically trading, storing, sending, receiving, accepting, and transmitting digital currency and cryptocurrency; computer software and computer hardware for use as a cryptocurrency wallet; computer software for use in managing digital currency payment and exchange transactions; computer software relating to the handling of online and digital financial transactions; digital, virtual and cryptocurrency exchange and trading software; downloadable computer software for managing cryptocurrency transactions using blockchain technology; computer software relating to cryptocurrency, digital and virtual currency; computer programs relating to financial matters; computer software relating to the handling of financial transactions; financial exchange software; currency exchange software; currency trading software; software for e-commerce over a global communications network; Artificial intelligence software; interactive software based on artificial intelligence and machine learning; downloadable computer software using artificial intelligence, machine learning, deep learning, and reinforcement learning for use in financial transactions and financial matters; data mining software; data processing software; downloadable computer software for blockchain technology; software applications; science software; simulation software; sensory software; interactive software; artificial intelligence and machine learning software; artificial intelligence software for healthcare; humanoid robots with artificial intelligence for use in scientific research; laboratory robots; smart glasses; optical glasses; virtual reality hardware and software; wearable computers; electric sensors; cameras; computer software relating to the medical field; software as a medical device (SaMD), downloadable; software for medical, clinical and scientific research; computer software for use in medical surgery; computer software for use in biotechnology; computer software for use in pharmaceutical drug discovery and development; computer software for use in clinical, medical and surgical product development; downloadable computer software using artificial intelligence, machine learning, deep learning, and reinforcement learning for use in medicine, clinical surgery and clinical and medical research; downloadable software for artificial intelligence (AI), machine learning, deep learning, and remote sensing in the fields of robotics; downloadable software for operating robots with artificial intelligence; Downloadable computer software for performing brain-computer-interface, neuroscience, neural engineering, neural prosthetics, thought to text communication, thought to voice communication, speech encoding and decoding, robotic, mobility, mobility equipment, mobility peripherals, motor control encoding and decoding, vision encoding and decoding, hearing encoding and decoding, speech assistant, vision assistant, hearing assistant, thought assistant, smart glasses, and artificial intelligence functions and tasks; Downloadable computer software using artificial intelligence (AI) for performing brain-computer-interface, neuroscience, neural engineering, neural prosthetics, thought to text communication, thought to voice communication, speech encoding and decoding, robotic, mobility, mobility equipment, mobility peripherals, motor control encoding and decoding, vision encoding and decoding, hearing encoding and decoding, speech assistant, vision assistant, hearing assistant, thought assistant, smart glasses, and artificial intelligence functions and tasks; Downloadable software for performing brain-computer-interface, neuroscience, neural engineering, neural prosthetics, thought to text communication, thought to voice communication, speech encoding and decoding, robotic, mobility, mobility equipment, mobility peripherals, motor control encoding

and decoding, vision encoding and decoding, hearing encoding and decoding, speech assistant, vision assistant, hearing assistant, thought assistant, smart glasses, and artificial intelligence functions and tasks; Downloadable open-source computer software for performing brain-computer-interface, neuroscience, neural engineering, neural prosthetics, thought to text communication, thought to voice communication, speech encoding, speech encoding and decoding, robotic, mobility, mobility equipment, mobility peripherals, motor control encoding and decoding, vision encoding and decoding, hearing encoding and decoding, speech assistant, vision assistant, hearing assistant, thought assistant, smart glasses, and artificial intelligence functions and tasks; Downloadable cloud-computer software for performing brain-computer-interface, neuroscience, neural engineering, neural prosthetics, thought to text communication, thought to voice communication, speech encoding and decoding, robotic, mobility, mobility equipment, mobility peripherals, motor control encoding and decoding, vision encoding and decoding, hearing encoding and decoding, speech assistant, vision assistant, hearing assistant, thought assistant, smart glasses, and artificial intelligence functions and tasks; Downloadable software for machine learning for use in robots; Downloadable software using artificial intelligence (AI) for speech recognition for use in robots; Wearable cameras; Wearable activity trackers; Wearable computers in the nature of smart glasses; Wearable computers in the nature of smartwatches; Wearable technological devices being virtual reality headsets; Teaching robots; Telepresence robots; User-programmable humanoid robots, not configured; Virtual reality glasses; Augmented reality glasses; Artificial intelligence software for analysis; Business intelligence software; Machine learning software for analysis; Interactive software based on artificial intelligence; cryptocurrency hardware wallets.

- **36 for** Financial services; financial information; cryptocurrency payment processing; Electronic funds transfer; electronic transfer of virtual currency, digital currency, and cryptocurrency; Issuance and redemption of tokens of value in the nature of virtual currency, digital currency, and cryptocurrency; providing financial information via a website; stablecoin payment processing; virtual currency, digital currency, and cryptocurrency exchange services; virtual currency, digital currency, and cryptocurrency financial transactions; financial lending relating to virtual currency, digital currency, and cryptocurrency lending; financial lending relating to virtual currency, digital currency, and cryptocurrency swapping services; virtual currency, digital currency, and cryptocurrency trading services; virtual currency, digital currency, and processing payments for the purchase of goods and services via an electronic communications network; financial grant services; financial investment; financial loan services; financing relating to scientific, clinical and medical research; Investment services; loan services; loans (financing); providing loans and grants for scientific, clinical and medical research; clearing and reconciling financial transactions via a global computer network; currency exchange services; currency trading; currency transfer services; digital currency exchange services; digital currency trading services; digital currency transfer services; digital token (cryptocurrency) exchange services; digital token financial trading; digital token financial transfer services; electronic financial trading services; Processing payments for the purchase of goods and services via an electronic communications network; financial exchange services, namely, a financial futures exchange for trading currency; financial exchange services, namely, a financial futures exchange for trading digital currency; financial exchange services, namely, a financial futures exchange for trading digital tokens; financial exchange services, namely, a financial futures exchange for trading tokens of value; financial exchange services, namely, a financial futures exchange for trading virtual currency; financial exchange services, namely, providing a financial exchange for trading currency; financial exchange services, namely, providing a financial exchange for trading digital currency; financial exchange services, namely, providing a financial exchange for trading digital tokens; financial exchange services, namely, providing a financial exchange for trading tokens of value; financial exchange services, namely, providing a financial exchange for trading virtual currency; financial services, namely, electronic funds transfer; financial services, namely, facilitating the deposit, holding, and withdrawal of electronic funds; financial services, namely, providing electronic transfer of a digital currency for use by members of an on-line community via a global computer network; financial services, namely, providing electronic transfer of a virtual currency for use by members of an on-line community via a global computer network; financial services, namely, providing electronic transfer of currency for use by members of an on-line community via a global computer network; financial services, namely, providing electronic transfer of digital tokens for use by members of an on-line community via a global computer network; financial services, namely, providing electronic transfer of valuable tokens

for use by members of an on-line community via a global computer network; Issuance and redemption of tokens of value in the nature of digital currency for currency; issuance and redemption of tokens of value; issuance and redemption of tokens of value in the nature of virtual currency for currency; issuance of tokens of value in the nature of digital tokens; issuance of tokens of value; on-line real-time currency trading; on-line real-time digital currency trading; on-line real-time digital token financial trading; on-line real-time valuable token financial trading; on-line real-time virtual currency trading; providing information via an internet website in the field of currency exchange services; providing information via an internet website in the field of digital currency exchange services; providing information via an internet website in the field of digital token exchange services; providing information via an internet website in the field of finance; providing information via an internet website in the field of financial transactions; providing information via an internet website in the field of valuable token exchange services; providing information via an internet website in the field of virtual currency exchange services; providing currency futures exchange services for trading currency; providing digital currency futures exchange services for trading digital currency; providing digital token futures exchange services for trading digital tokens; providing information in the field of finance; providing personal loans and lines of credit; providing valuable token futures exchange services for trading tokens of value; providing virtual currency futures exchange services for trading virtual currency; valuable token financial exchange services; valuable token financial trading; valuable token financial transfer services; virtual currency exchange services; virtual currency trading services;; virtual currency transfer services; consultancy relating to financing of energy projects; financial services relating to the creation and issue of financial instruments based on the creation, sale, transmission and processing of electricity or fuels; financial economic analysis and financial evaluation of renewable energy projects; energy commodity trading; Financial consultancy in the energy sector; providing peer to peer financial services namely trading, lending, financing and exchange of digital tokens, valuable tokens, digital currency, and virtual currency via an online financing platform; provision of financial funding and investment of projects relating to energy production, supply and distribution including renewable energy; trading of electricity and gas as financial commodities.

- **40 for** Treatment of Materials; carbon capture; electricity generation; generation of electricity from solar energy; generation of electricity from wind, solar, thermal, geothermal and wave energy; generation of energy from renewable sources; generation of energy via wind farms; generation of gas and electricity; hydrogen powered electricity generation; information, consultancy and advisory services relating to the above; power generation; production of electrical energy from renewable sources; Production of energy; production of gas and electricity; production of hydroelectric power; production of renewable green energy; production of electrical power obtained using geothermal energy systems; services for the treatment of carbon emissions (carbon capture).

- **42 for** Provision of on-line non-downloadable software; Software as a Service [SaaS]; computer hardware design and development; providing online, non-downloadable software; scientific research; software creation; software design; software development; software research; Science and technology services; advanced product research, design and development in the field of artificial intelligence; artificial intelligence consultancy; biological research, clinical research and medical research; biotechnology research; consultancy in the field of biotechnology; consulting services in the field of software as a service [SaaS]; product design and development of clinical, medical and surgical instruments, tools, apparatus and devices; design and development of computer software for use with medical technology; product design and development of medical implants, chips and prosthetics; designing and developing artificial intelligence, deep learning, machine learning, and reinforcement learning software; development and testing of computing methods, algorithms, computer software, and computer hardware; engineering services relating to robotics; medical research laboratory services; platforms for artificial intelligences as software as a service [SaaS]; product research and development; Providing online non downloadable computer software for use in biotechnology; Providing online non- downloadable computer software for use in clinical, medical and surgical product development; Providing online non-downloadable computer software for use in pharmaceutical drug discovery and development; Providing online non-downloadable computer software relating to the medical field; Providing online non-downloadable online software for artificial intelligence, machine learning, and

deep learning; Providing non-downloadable software for medical, clinical and scientific research; providing temporary use of non-downloadable cloud based software for use in connection with robotics; research and development in the field of biotechnology; research and development services in the field of robots and robotics; research and development services in the fields of artificial intelligence, machine learning, deep learning, and reinforcement learning; research in the field of artificial intelligence; research in the field of artificial intelligence technology; research relating to technology; scientific research for medical purposes; software as a service [SaaS] services featuring software for use in connection with robotics; software as a service [SaaS] services featuring software using artificial intelligence, machine learning, deep learning, and reinforcement learning for use in medicine, clinical surgery and clinical and medical research; technology research in the field of artificial intelligence, machine learning, deep learning, and reinforcement learning for use in medicine, clinical surgery and clinical and medical research; Providing online non-downloadable computer software for using machine learning, artificial intelligence (AI) and large language models (LLMs) for the purpose of data analytics, question-answering systems, problem solving, knowledge retrieval systems, chatbots, personal digital assistants, and intelligent agents; Providing online non-downloadable software that enables users to share and collaboratively develop software, computer code, and user-generated content, in particular open source software; Providing online non-downloadable artificial intelligence software to act as a virtual or personal digital assistant; Providing online non-downloadable software featuring conversational artificial intelligence assistance; Software as a service with computer chatbot software for simulating conversations for use in diagnosing problems, question and answering services, and providing responses; Software as a service with software for using machine learning, artificial intelligence (AI) and large language models (LLMs) for the purpose of data analytics, question-answering systems, problem solving, knowledge retrieval systems, chatbots, personal digital assistants, and intelligent agents; Application service provider [ASP] featuring software using artificial intelligence (AI) for performing biotechnology, brain-computer-interface, neuroscience, neural engineering, neural prosthetics, thought to text communication, thought to voice communication, speech encoding and decoding, robotic, mobility, mobility equipment, mobility peripherals, motor control encoding and decoding, vision encoding and decoding, hearing encoding and decoding, speech assistant, vision assistant, hearing assistant, thought assistant, smart glasses, and artificial intelligence functions and tasks; Artificial intelligence as a service [AIAAS] services featuring software using artificial intelligence (AI) for performing biotechnology, brain-computer-interface, neuroscience, neural engineering, neural prosthetics, thought to text communication, thought to voice communication, speech encoding and decoding, robotic, mobility, mobility equipment, mobility peripherals, motor control encoding and decoding, vision encoding and decoding, hearing encoding and decoding, speech assistant, vision assistant, hearing assistant, thought assistant, smart glasses, and artificial intelligence functions and tasks; Design and development of artificial intelligence (AI) software; Development of new technology for others in the field of biotechnology, brain-computer-interface, neuroscience, neural engineering, neural prosthetics, thought to text communication, thought to voice communication, speech encoding and decoding, robotic, mobility, mobility equipment, mobility peripherals, motor control encoding and decoding, vision encoding and decoding, hearing encoding and decoding, speech assistant, vision assistant, hearing assistant, thought assistant, smart glasses, and artificial intelligence; Neuro artificial intelligence (NeuroAI) scientific research; Neurotech scientific research; Providing an online non-downloadable Internet-based system application featuring technology enabling users to perform biotechnology, brain-computer-interface, neuroscience, neural engineering, neural prosthetics, thought to text communication, thought to voice communication, speech encoding and decoding, robotic, mobility, mobility equipment, mobility peripherals, motor control encoding and decoding, vision encoding and decoding, hearing encoding and decoding, speech assistant, vision assistant, hearing assistant, thought assistant, smart glasses, and artificial intelligence functions and tasks; Providing information relating to computer technology via a website; Providing technology information in the field of biotechnology, brain-computer-interface, neuroscience, neural engineering, neural prosthetics, thought to text communication, thought to voice communication, speech encoding and decoding, robotic, mobility, mobility equipment, mobility peripherals, motor control encoding and decoding, vision encoding and decoding, hearing encoding and decoding, speech assistant, vision assistant, hearing assistant, thought assistant, smart glasses, and artificial intelligence; Providing temporary use of on-line non-downloadable cloud computing software using artificial intelligence (AI) for performing biotechnology, brain-computer-interface, neuroscience, neural engineering, neural prosthetics, thought to text

communication, thought to voice communication, speech encoding and decoding, robotic, mobility, mobility equipment, mobility peripherals, motor control encoding and decoding, vision encoding and decoding, hearing encoding and decoding, speech assistant, vision assistant, hearing assistant, thought assistant, smart glasses, and artificial intelligence functions and tasks; Providing temporary use of on-line non-downloadable open-source software for performing biotechnology, brain-computer-interface, neuroscience, neural engineering, neural prosthetics, thought to text communication, thought to voice communication, speech encoding and decoding, robotic, mobility, mobility equipment, mobility peripherals, motor control encoding and decoding, vision encoding and decoding, hearing encoding and decoding, speech assistant, vision assistant, hearing assistant, thought assistant, smart glasses, and artificial intelligence functions and tasks; Providing temporary use of on-line non-downloadable software and applications using artificial intelligence (AI) for performing biotechnology, brain-computer-interface, neuroscience, neural engineering, neural prosthetics, thought to text communication, thought to voice communication, speech encoding and decoding, robotic, mobility, mobility equipment, mobility peripherals, motor control encoding and decoding, vision encoding and decoding, hearing encoding and decoding, speech assistant, vision assistant, hearing assistant, thought assistant, smart glasses, and artificial intelligence functions and tasks; Providing temporary use of on-line non-downloadable software for accessing, reading, and tracking information in the field of performing biotechnology, brain-computer-interface, neuroscience, neural engineering, neural prosthetics, thought to text communication, thought to voice communication, speech encoding and decoding, robotic, mobility, mobility equipment, mobility peripherals, motor control encoding and decoding, vision encoding and decoding, hearing encoding and decoding, speech assistant, vision assistant, hearing assistant, thought assistant, smart glasses, and artificial intelligence functions and tasks on a blockchain; Research and development in the field of biotechnology.
