GardenWaste Disposal Guidelines for Landscapers

Department of
Environmental Health
Working now and for the Future

What is Garden Waste?

Garden Waste is also known as **green or yard waste**. This waste is usually biodegradable and includes grass & flower clippings, tree branches, bushes, leaves etc.

Garden Waste is bulky and takes up a significant amount of landfill space.

Reduce Garden Waste By:

Convert garden waste to mulch and compost. Use a wood chipper to shred large branches into small manageable pieces.

Reuse tree logs generated in garden maintenance as garden decor. These can be used as benches or decorative features.

Separate all garden waste from other waste items generated during the landscaping process. These include packaging materials used to store fertilizers, seedlings etc.

Disposal of GardenWaste

Refrain from blowing vegetation on to public roads or private property. **This is illegal.**

Section 3 (1) Litter Law (1997 Revision) Whoever throws down, drops or otherwise deposits and leaves any litter in, into, or from a public place in such circumstances as to cause, contribute to or tend to lead to its defacement by such litter is guilty of an offence and liable to conviction to a fine of five hundred dollars or to imprisonment for six months.

Remove all garden waste generated during the course of the landscaping activity from the worksite. Leaving garden waste on public/private property is considered to be illegal dumping.
