## TRADE MARKS

---

### Applications for Registrations

---

Trade Mark was registered in the Cayman Islands

**On:** 23 December 2025

**No:** T0004676

**Word/Mark:** **E11EVEN**

**Class List:**

- **25 for** Clothing, namely, shirts, swimwear; footwear, headwear
- **39 for** Cruise ship transport, travel and cruise services
- **41 for** Entertainment, namely, live music concerts; Arranging, organizing, conducting, and hosting social entertainment events; Entertainment services in the nature of arranging social entertainment events; Entertainment services in the nature of hosting social entertainment events; Entertainment services in the nature of organizing social entertainment events; Arranging and conducting nightclub entertainment events; Conducting entertainment exhibitions in the nature of musical performances; Entertainment services, namely, conducting parties; Arranging and conducting nightclub parties; Night clubs; Dance club services; Day clubs, namely, entertainment services in the nature of conducting parties, providing facilities for recreational activities in the nature of poolside and water activities, namely, swimming; Night club services in the nature of arranging and coordinating nightclub parties and entertainment events featuring access to beach and pool facilities; all of the foregoing provided aboard cruise ships
- **43 for** Hotel, hospitality [food and drink and accommodations], bar, and restaurant services, in each case, on a cruise ship

**Date of Expiry:** 23 December 2035

**Proprietor:** GR OPCO, LLC  
29 NE 11th Street  
Miami, Florida 33132  
United States of America

**Agent:** KSG ATTORNEYS AT LAW  
P. O. Box 2255  
One Capital Place, 3rd Floor  
Shedden Road  
Grand Cayman KY1-1107  
Cayman Islands

**Oppositions to, or observations in respect of, the above-cited application, whose number on the Register is T0004676, should be submitted not later than the 12<sup>th</sup> day of June, 2026.**

Trade Mark was registered in the Cayman Islands

**On:** 23 December 2025

**No:** T0004678

**Word/Mark:**

**Class List:**

- **44 for** Beauty care and provision of public bath facilities for personal hygiene services for human beings; hairdressing services, including hair cutting, styling, colouring, and hair treatment services; skincare services; facial and body treatment services; manicure and pedicure services; spa services; health spa services; medical spa services; wellness and holistic therapy services, namely, aromatherapy services, reflexology, hydrotherapy, and physical therapy services for wellness purposes; massage services, including therapeutic, relaxation, and specialty massages; sauna services; Turkish bath services; sauna steam bath services; indoor and outdoor thermal bath services; cosmetic and aesthetic treatments, namely, performing non-invasive cosmetic medical procedures; cosmetic body care services; advisory and consultancy services relating to the aforesaid beauty, personal care, wellness, and spa services.

**Date of Expiry:** 23 December 2035

**Proprietor:** Mandarin Oriental (UK) Limited  
5th Floor  
110 High Holborn  
London WC1V 6JS  
United Kingdom

**Agent:** HSM IP LTD.  
P. O. Box 31726  
68 Fort Street  
George Town  
Grand Cayman KY1-1207  
Cayman Islands

**Oppositions to, or observations in respect of, the above-cited application, whose number on the Register is T0004678, should be submitted not later than the 12<sup>th</sup> day of June, 2026.**

Trade Mark was registered in the Cayman Islands

**On:** 29 December 2025

**No:** T0004680

**Word/Mark:**

**Class List:**

- **09 for** Downloadable computer software using artificial intelligence (AI) for machine learning (ML) and deep learning (DL) for customer relationship management (CRM), customer service, customer engagement, customer data platform, contact center and helpdesk functionality, communications, processing data, generating customer marketing campaigns and journeys, predicting customer communication channel preferences, communication date and time optimization, an implementation assistant for data tracking, testing and experimentation, phone number quality scoring, fraud detection, fraud identification, fraud prevention and response, intelligent channel orchestration, live traffic monitoring, traffic optimization, live traffic routing, multi-tenancy, market throughput, traffic shaping, traffic insights, intelligent capacity matching, anomaly detection, a no-code builder for conversational artificial intelligence (AI), messaging, creating postings, file sharing, calendaring, telephone call processing, web-based telephony, internet telephony (VoIP) services, voicemail, facsimile services, sales automation, sales performance management, field services management, mapping and route planning, managing online content, deploying customized interactive content, optimization of online websites for third parties for marketing purposes, big data and business data analysis and visualization, complex event processing, mining the most relevant information from disparate data sources, providing automated solutions to enable organizations to integrate disparate data and translate and structure that data into actionable insights, creating searchable databases of information and data, security and authentication, social media management and publication, data storage, collaboration, e-commerce, software and application development, and speech analysis; Downloadable computer software using artificial intelligence (AI) for machine learning (ML), deep learning (DL), statistical learning, data mining, contextual prediction, personalization, business predictive analytics, business predictive modeling, business intelligence, and intelligent recommendations and decision advantage; Downloadable Computer software using artificial intelligence (AI) for software bots, software assistants, virtual agents, and chatbots; Downloadable software, downloadable cloud-based software, and software in the nature of a downloadable mobile application for the generation, processing, understanding and analysis of multi-modal machine learning (ML) based on language, text, speech, images, videos, sounds, events, and tasks; Downloadable software, downloadable cloud-based software, and software in the nature of a downloadable mobile application for generating and executing autonomous tasks in response to exposure to data, and building, managing, updating, developing, training, evaluating, and monitoring generative user experiences powered by machine learning (ML), deep learning (DL), and artificial intelligence (AI); Downloadable telecommunication and telephony software for use in computerized telephony applications; Downloadable computer software development tools; downloadable application programming interface (API) software; downloadable computer software for use in software development; Home and office automation systems comprising of computer hardware and downloadable software, wireless and wired controllers, and electric control devices for automating the monitoring and control of appliances, power, lighting, HVAC, and security via wireless Internet; Subscriber identification module (SIM) cards for internet of things (IOT) enabled devices; Microcontrollers for internet of things (IoT) enabled devices; Downloadable computer software programs for connecting remotely to computers or computer networks; computer hardware and downloadable software for enhancing and providing real-time transfer, transmission, reception, processing and digitizing of audio and video graphics information; computer hardware for telecommunications.

- **35 for** Providing business marketing and advertising services for enterprises with large volumes of data that must be leveraged for intelligent recommendations and decision advantage through data science, namely, artificial intelligence (AI), machine learning (ML) and deep learning (DL) technologies and algorithms; Business management services in the fields of customer relationship management (CRM), marketing automation, sales automation, sales performance management, customer service and support, customizable marketing and advertising, managing online content, deploying customized interactive content, optimization of online websites for third parties for marketing purposes, predictive analytics, big data and business data analysis and visualization, complex event processing, artificial intelligence (AI), machine learning (ML), and deep learning (DL), mining the most relevant information from disparate data sources, providing automated solutions to enable organizations to integrate disparate data and translate and structure that data into actionable insights, creating searchable databases, security and authentication, social media management and publication, data storage, collaboration, e-commerce, and software and application development, programming, and implementation; Advertising, promotion, and marketing services in the nature of using artificial intelligence (AI) for auto-generating content for marketing campaigns.
- **38 for** Voice over internet protocol (VOIP) services; communication services, namely, transmission of data from cloud networks for telecommunications networks via the Internet; transmission of electronic mail and electronic messaging services; delivery of messages by electronic transmission for others; Telecommunication services, namely, computerized telephony services; Providing telecommunication connections to internet or databases; Providing telecommunications connections to a global computer network; Telecommunication services, namely, transmission of data for internet of things (IOT) enabled devices via global communication networks; telecommunications services, namely, providing IOT enabled devices access to a global computer network.
- **42 for** Software as a service (SaaS) services featuring software using artificial intelligence (AI) for machine learning (ML) and deep learning (DL) for customer relationship management (CRM), customer service and support, customer engagement, customer data platform, workforce management, contact center and helpdesk functionality, marketing automation, sales automation, sales performance management, field services management, mapping and route planning, customizable marketing and advertising, managing online content, deploying customized interactive content, optimization of online websites for third parties for marketing purposes, predictive analytics, big data and business data analysis and visualization, complex event processing, data mining, providing automated solutions to enable the integration of disparate data and translation and structuring of that data into actionable insights, creating searchable databases, security and authentication, social media management and publication, data storage, collaboration, e-commerce, software and application development, communications, communication routing, cloud communication services, data science, statistical learning, contextual prediction, predictive modeling, business intelligence, intelligent recommendations and decision advantage, facilitating communication and actions between humans and artificial intelligence (AI) chatbots and agents and between artificial intelligence (AI) chatbots and agents, a no-code builder for conversational artificial intelligence (AI), monitoring generative user experiences, generating and executing autonomous tasks, data mapping, automated personal information and personally identifiable information (PII) redaction, voice and speech recognition, providing insights and smart recommendations about and for customers, conversational analytics, creating actionable recommendations about operational tasks such as identifying trends in customer interactions and recommending changes to customer support process, software bots, software assistants, virtual agents, chatbots, task automation, creating postings, file sharing, calendaring, telephone call processing, web-based telephony, internet telephony (VoIP) services, voicemail, facsimile services, providing call center quality management, compliance enforcement by providing generated feedback and conversational insights to agents and supervisors, phone number quality scoring, fraud detection, fraud identification, fraud prevention, fraud response, intelligent channel orchestration, live traffic monitoring, traffic optimization, live traffic routing, multi-tenancy, market throughput, traffic shaping, traffic insights, intelligent capacity matching, anomaly detection, data compliance, auditing, data tracking, generating marketing campaigns, and customer journeys, predicting customer communication channel preferences, communication date and time optimization, testing and experimentation, updating website content, interpreting sentiment, summarizing conversations, generating responses, building differentiated large language model (LLM) applications using context from customer data; Application service provider (ASP) services featuring application programming interface (API) software for artificial intelligence (AI), machine learning (ML), deep learning (DL), statistical learning, and data mining to enable contextual prediction, personalization, predictive analytics, predictive modeling,

visualization, business intelligence, and intelligent recommendations and decision advantage; Research and development services in the fields of multi-modal content understanding and generation, natural language processing (NLP), artificial intelligence (AI), and machine learning (ML); Computer services, namely, software as a service (SaaS), platform as a service (PaaS), data mining, data warehousing, computer software design, and computer software consultation, featuring software for artificial intelligence (AI), machine learning (ML), and deep learning (DL); Software as a service (SaaS) featuring software for a framework of intelligent data science-based services using artificial intelligence (AI) and machine learning (ML) for improving digital experiences in the fields of design, document management and delivery, and marketing and advertising; Providing application programming interface (API) software for integration of artificial intelligence (AI) and machine learning (ML) into websites and online software; Cloud computing services featuring software for artificial intelligence (AI), machine learning (ML), and deep learning (DL); Platform as a service (PaaS) services featuring software for artificial intelligence (AI), machine learning (ML), and deep learning (DL); Scientific and technical research, namely, scientific and product research in the fields of artificial intelligence (AI), machine learning (ML), and deep learning (DL); Application service provider featuring application programming interface (API) software and on-line, non-downloadable software development tools for use in enabling cloud communication services; platform as a service (PAAS) featuring application programming interface (API) software and on-line, non-downloadable software development tools for cloud communication services; Software as a service (SAAS) services featuring software for electronic mail and digital messaging; Providing temporary use of online non-downloadable telecommunications software for computerized telephony services; Software as a service (SAAS) services featuring software for business analytics, business intelligence, customer relationship management, and customer engagement; Platform as a service (PAAS) services featuring software for business analytics, business intelligence, customer relationship management, and customer engagement; providing temporary use of non-downloadable software for use in customer relationship management (CRM); providing temporary use of on-line non-downloadable software development tools; computer software development in the field of mobile applications; software as a service (SAAS) services featuring software for providing data analytics, business analytics, business intelligence and for collecting and analyzing data in the fields of business, marketing, advertising, brand development, sales, customer service, customer engagement, cloud computing, customer information, customer relationship management, and security and authentication; Application service provider featuring application programming interface (API) software for communications, customer engagement, data analytics, business intelligence, and customer relationship management; providing online, non-downloadable software for managing, collecting, integrating, and sharing a wide variety of data and information from various sources; application service provider (ASP), namely, providing software tools for computer software development; platform as a service (PaaS) featuring computer software platforms for retrieving, tracking, analyzing, testing, measuring and managing data, customer data and customer interactions in the fields of business, marketing, advertising, brand development, sales, customer service, customer engagement, cloud computing, customer information, customer relationship management, and security and authentication; providing temporary use of on-line non-downloadable software development tools for the creation of client interfaces; providing temporary use of on-line non-downloadable cloud computing software for providing business intelligence, business data analytics, and for collecting and analyzing business data; software as a service (SAAS) services featuring software for collecting, managing and reporting on data from connected computer systems, digital mobile devices, and Internet of Things (IoT) devices; software as a service (SaaS) services featuring software for controlling and monitoring of cloud computing networks and Internet of Things (IoT) devices; infrastructure as a service (IaaS) services featuring software for controlling and monitoring Internet of Things (IoT) devices and networks.

**Date of Expiry:** 29 December 2035

**Proprietor:** TWILIO INC.  
101 Spear St., Ste. 500  
San Francisco  
California 94105  
United States of America

**Agent:** CAMPBELLS  
P. O. Box 884  
Floor 4, Willow House  
Cricket Square  
Grand Cayman KY1-9010  
Cayman Islands

**Oppositions to, or observations in respect of, the above-cited application, whose number on the Register is T0004680, should be submitted not later than the 12<sup>th</sup> day of June, 2026.**

Trade Mark was registered in the Cayman Islands

**On:** 29 December 2025

**No:** T0004681

**Word/Mark:** **TWILIO**

**Class List:**

- **09 for** Downloadable computer software using artificial intelligence (AI) for machine learning (ML) and deep learning (DL) for customer relationship management (CRM), customer service, customer engagement, customer data platform, contact center and helpdesk functionality, communications, processing data, generating customer marketing campaigns and journeys, predicting customer communication channel preferences, communication date and time optimization, an implementation assistant for data tracking, testing and experimentation, phone number quality scoring, fraud detection, fraud identification, fraud prevention and response, intelligent channel orchestration, live traffic monitoring, traffic optimization, live traffic routing, multi-tenancy, market throughput, traffic shaping, traffic insights, intelligent capacity matching, anomaly detection, a no-code builder for conversational artificial intelligence (AI), messaging, creating postings, file sharing, calendaring, telephone call processing, web-based telephony, internet telephony (VoIP) services, voicemail, facsimile services, sales automation, sales performance management, field services management, mapping and route planning, managing online content, deploying customized interactive content, optimization of online websites for third parties for marketing purposes, big data and business data analysis and visualization, complex event processing, mining the most relevant information from disparate data sources, providing automated solutions to enable organizations to integrate disparate data and translate and structure that data into actionable insights, creating searchable databases of information and data, security and authentication, social media management and publication, data storage, collaboration, e-commerce, software and application development, and speech analysis; Downloadable computer software using artificial intelligence (AI) for machine learning (ML), deep learning (DL), statistical learning, data mining, contextual prediction, personalization, business predictive analytics, business predictive modeling, business intelligence, and intelligent recommendations and decision advantage; Downloadable Computer software using artificial intelligence (AI) for software bots, software assistants, virtual agents, and chatbots; Downloadable software, downloadable cloud-based software, and software in the nature of a downloadable mobile application for the generation, processing, understanding and analysis of multi-modal machine learning (ML) based on language, text, speech, images, videos, sounds, events, and tasks; Downloadable software, downloadable cloud-based software, and software in the nature of a downloadable mobile application for generating and executing autonomous tasks in response to exposure to data, and building, managing, updating, developing, training, evaluating, and monitoring generative user experiences powered by machine learning (ML), deep learning (DL), and artificial intelligence (AI); Downloadable telecommunication and telephony software for use in computerized telephony applications; Downloadable computer software development tools; downloadable application programming interface (API) software; downloadable computer software for use in software development; Home and office automation systems comprising of computer hardware and downloadable software, wireless and wired controllers, and electric control devices for automating the monitoring and control of appliances, power, lighting, HVAC, and security via wireless Internet; Subscriber identification module (SIM) cards for internet of things (IOT) enabled devices; Microcontrollers for internet of things (IoT) enabled devices; Downloadable computer software programs for connecting remotely to computers or computer networks; computer hardware and downloadable software for enhancing and providing real-time transfer, transmission, reception, processing and digitizing of audio and video graphics information; computer hardware for telecommunications.
- **35 for** Providing business marketing and advertising services for enterprises with large volumes of data that must be leveraged for intelligent recommendations and decision advantage through data science, namely, artificial intelligence (AI), machine learning (ML) and deep learning (DL) technologies and algorithms; Business management consultancy in the fields of business strategies and business solutions related to customer relationship management (CRM), marketing automation, sales automation, sales performance management, customer service and support, customizable marketing and advertising, managing online content, deploying customized interactive content, optimization of online websites for third parties for marketing purposes, predictive analytics, big data and business data analysis and visualization, complex event processing, artificial intelligence (AI), machine learning (ML), and deep learning (DL), mining the most

relevant information from disparate data sources, providing automated solutions to enable organizations to integrate disparate data and translate and structure that data into actionable insights, creating searchable databases, security and authentication, social media management and publication, data storage, collaboration, e-commerce, and software and application development, programming, and implementation; Advertising, promotion, and marketing services provided with the help of artificial intelligence (AI) for auto-generating content for marketing campaigns.

- **38 for** Providing telecommunication connections to internet or databases; Providing telecommunications connections to a global computer network; Telecommunication services, namely, transmission of data for internet of things (IOT) enabled devices via global communication networks; telecommunications services, namely, providing IOT enabled devices access to a global computer network; Computerized telephony services; Voice over internet protocol (VOIP) services; communication services, namely, transmission of data from cloud networks for telecommunications networks via the Internet; transmission of electronic mail and electronic messaging services; delivery of messages by electronic transmission for others
- **42 for** Software as a service (SaaS) services featuring software using artificial intelligence (AI) for machine learning (ML) and deep learning (DL) for customer relationship management (CRM), customer service and support, customer engagement, customer data platform, workforce management, contact center and helpdesk functionality, marketing automation, sales automation, sales performance management, field services management, mapping and route planning, customizable marketing and advertising, managing online content, deploying customized interactive content, optimization of online websites for third parties for marketing purposes, predictive analytics, big data and business data analysis and visualization, complex event processing, data mining, providing automated solutions to enable the integration of disparate data and translation and structuring of that data into actionable insights, creating searchable databases, security and authentication, social media management and publication, data storage, collaboration, e-commerce, software and application development, communications, communication routing, cloud communication services, data science, statistical learning, contextual prediction, predictive modeling, business intelligence, intelligent recommendations and decision advantage, facilitating communication and actions between humans and artificial intelligence (AI) chatbots and agents, a no-code builder for conversational artificial intelligence (AI), monitoring generative user experiences, generating and executing autonomous tasks, data mapping, automated personal information and personally identifiable information (PII) redaction, voice and speech recognition, providing insights and smart recommendations about and for customers, conversational analytics, creating actionable recommendations about operational tasks such as identifying trends in customer interactions and recommending changes to customer support process, software bots, software assistants, virtual agents, chatbots, task automation, creating postings, file sharing, calendaring, telephone call processing, web-based telephony, internet telephony (VoIP) services, voicemail, facsimile services, providing call center quality management, compliance enforcement by providing generated feedback and conversational insights to agents and supervisors, phone number quality scoring, fraud detection, fraud identification, fraud prevention, fraud response, intelligent channel orchestration, live traffic monitoring, traffic optimization, live traffic routing, multi-tenancy, market throughput, traffic shaping, traffic insights, intelligent capacity matching, anomaly detection, data compliance, auditing, data tracking, generating marketing campaigns, and customer journeys, predicting customer communication channel preferences, communication date and time optimization, testing and experimentation, updating website content, interpreting sentiment, summarizing conversations, generating responses, building differentiated large language model (LLM) applications using context from customer data, and application service provider (ASP) services featuring application programming interface (API) software for artificial intelligence (AI), machine learning (ML), deep learning (DL), statistical learning, and data mining to enable contextual prediction, personalization, predictive analytics, predictive modeling, visualization, business intelligence, and intelligent recommendations and decision advantage; Research and development services in the fields of multi-modal content understanding and generation, natural language processing (NLP), artificial intelligence (AI), and machine learning (ML); Computer services, namely, software as a service (SaaS), platform as a service (PaaS), data mining, data warehousing, computer software design, and computer software consultation, featuring software for artificial intelligence (AI), machine learning (ML), and deep learning (DL); Software as a service (SaaS) featuring software for a framework of intelligent data science-based services using artificial intelligence (AI) and machine learning (ML) for improving digital experiences in the fields of design, document management and delivery, and marketing and advertising; Providing application programming interface (API) software for integration of artificial intelligence (AI) and machine learning (ML) into websites and online software; Cloud computing services featuring software for artificial

intelligence (AI), machine learning (ML), and deep learning (DL); Platform as a service (PaaS) services featuring software for artificial intelligence (AI), machine learning (ML), and deep learning (DL); Scientific and technical research, namely, scientific and product research in the fields of artificial intelligence (AI), machine learning (ML), and deep learning (DL); Providing temporary use of online non-downloadable telecommunications software for computerized telephony services; Application service provider featuring application programming interface (API) software and on-line, non-downloadable software development tools for use in enabling cloud communication services; platform as a service (PAAS) featuring application programming interface (API) software and on-line, non-downloadable software development tools for cloud communication services; Software as a service (SAAS) services featuring software for electronic mail and digital messaging; Software as a service (SAAS) services featuring software for business analytics, business intelligence, customer relationship management, and customer engagement; Platform as a service (PAAS) services featuring software for business analytics, business intelligence, customer relationship management, and customer engagement; providing temporary use of non-downloadable software for use in customer relationship management (CRM); providing temporary use of on-line non-downloadable software development tools; computer software development in the field of mobile applications; software as a service (SAAS) services featuring software for providing data analytics, business analytics, business intelligence and for collecting and analyzing data in the fields of business, marketing, advertising, brand development, sales, customer service, customer engagement, cloud computing, customer information, customer relationship management, and security and authentication; Application service provider featuring application programming interface (API) software for communications, customer engagement, data analytics, business intelligence, and customer relationship management; providing online, non-downloadable software for managing, collecting, integrating, and sharing a wide variety of data and information from various sources; application service provider (ASP), namely, providing software tools for computer software development; platform as a service (PaaS) featuring computer software platforms for retrieving, tracking, analyzing, testing, measuring and managing data, customer data and customer interactions in the fields of business, marketing, advertising, brand development, sales, customer service, customer engagement, cloud computing, customer information, customer relationship management, and security and authentication; providing temporary use of on-line non-downloadable software development tools for the creation of client interfaces; providing temporary use of on-line non-downloadable cloud computing software for providing business intelligence, business data analytics, and for collecting and analyzing business data; software as a service (SAAS) services featuring software for collecting, managing and reporting on data from connected computer systems, digital mobile devices, and Internet of Things (IoT) devices; software as a service (SaaS) services featuring software for controlling and monitoring of cloud computing networks and Internet of Things (IoT) devices; infrastructure as a service (IaaS) services featuring software for controlling and monitoring Internet of Things (IoT) devices and networks.

**Oppositions to, or observations in respect of, the above-cited application, whose number on the Register is T0004681, should be submitted not later than the 12<sup>th</sup> day of June, 2026.**

Trade Mark was registered in the Cayman Islands

**On:** 30 December 2025

**No:** T0004682

**Word/Mark:** **ZIP**

**Class List:**

- **09 for** Downloadable computer software for creating searchable databases and modules of information and data that enable organizations to manage their product and service sourcing, procurement, supplier management, supply chain management, contract management, spend management, spend analysis, workflows, approval processes, and accounts payable activities; Downloadable computer software for giving a secured and encrypted access to a platform to buyers and providers for optimizing their purchasing, procurement and financing process, for performance evaluation, management of invoices and contracts, creation and management of expense reports, and management of providers in the control of their projects and relationships between buyers and providers; Downloadable computer software for facilitating electronic procurement services and expense management; Downloadable computer software for use in automating and handling intake-to-procure and procure-to-pay requests; Downloadable computer software using artificial intelligence (AI) for automating intake and procurement workflows, analyzing supplier and vendor data, identifying supplier and vendor risks, and generating supplier and vendor recommendations and reports; Downloadable computer software for integrating procurement systems with third-party business software and systems; Downloadable computer software for vendor and supplier risk assessments, vendor and supplier due diligence, and vendor and supplier compliance monitoring; Downloadable computer software for business procurement data, analytics, and reporting; Downloadable computer software for document and contract data extraction, management, and analysis in the field of business procurement; Downloadable computer software for automating and managing business approval routing and intake requests; Downloadable computer software using artificial intelligence (AI) for handling, managing, and validating intake requests and approval tasks; Downloadable computer software for managing, routing, approving, facilitating, processing, and verifying business payments, business purchase requests, and business financial transactions in the field of business procurement; Downloadable computer software for managing, routing, approving, facilitating, processing, and verifying global business payments to suppliers and vendors; Downloadable computer software for tracking and reconciling vendor and supplier payments and linking business payment transactions to procurement workflows; Downloadable computer software for managing, handling, reviewing, and validating vendor and supplier onboarding, approval workflows, invoices, and business purchase orders; Downloadable computer software for managing, routing, and automating business intake requests and routing approval tasks across compliance, customer operations, information technology, finance, legal, human resources, and security departments; Downloadable computer software for managing sourcing and vendor selection processes, namely, software for creating and issuing requests for proposals and quotes, collecting and comparing supplier and vendor responses, scoring supplier and vendor submissions, and facilitating sourcing and vendor decisions; Downloadable computer software for synchronizing data between enterprise applications and generating reports relating to workflow status and business operations; Downloadable computer software for building and customizing software applications, and creating, deploying, and managing autonomous or semi-autonomous software agents; none of the foregoing for use in consumer credit or consumer installment plan payment services or software.
- **35 for** Provision of online computer databases, and databases which are searchable online, namely, providing online databases comprised of modules of information and data in the field of goods and services procurement and supply chains that enable data analytics, business analytics, business intelligence, and for managing, collecting, analyzing procurement and supply chain data; Business data analysis services in the field of procurement, sourcing, vendor management, spend management, and spend analysis; Providing business information in the field of vendor performance, sourcing efficiency, and spend analytics; Providing business intelligence services; Business consulting services in the field of procurement process management and automation; Business risk assessment services; Business consultancy relating to due diligence; Business consulting services in the field of third-party vendor and supplier risk assessments; none of the foregoing for use in consumer credit or consumer installment plan payment services or software.

- **42 for** Provision of software, namely, providing temporary use of online non-downloadable computer software for creating searchable databases and modules of information and data that enable organizations to manage their product and service sourcing, procurement, supplier management, supply chain management, contract management, spend management, spend analysis, workflows, approval processes, and accounts payable activities; Provision of software and applications, namely, providing temporary use of online non-downloadable software giving a secured and encrypted access to a platform to buyers and providers for optimizing their purchasing, procurement and financing process, for performance evaluation, management of invoices and contracts, creation and management of expense reports, and management of providers in the control of their projects and relationships between buyers and providers; Software as a service (SaaS) services featuring software to facilitate electronic procurement services and expense management; Providing temporary use of online non-downloadable software using artificial intelligence (AI) for automating intake and procurement workflows, analyzing supplier and vendor data, identifying supplier and vendor risks, and generating supplier and vendor recommendations and reports; Providing temporary use of online non-downloadable computer software for use in automating and handling intake-to-procure and procure-to-pay requests; Providing temporary use of online non-downloadable computer software for integrating procurement systems with third-party business software and systems; Providing temporary use of online non-downloadable computer software for vendor and supplier risk assessments, vendor and supplier due diligence, and vendor and supplier compliance monitoring; Providing temporary use of online non-downloadable computer software for business procurement data, analytics, and reporting; Providing temporary use of online non-downloadable computer software for document and contract data extraction, management, and analysis in the field of business procurement; Providing temporary use of online non-downloadable computer software for automating and managing business approval routing and intake requests; Providing temporary use of online non-downloadable chatbot software using artificial intelligence (AI) for handling, managing, and validating intake requests and approval tasks; Providing temporary use of online non-downloadable computer software for managing, routing, approving, facilitating, processing, and verifying business payments, business purchase requests, and business financial transactions in the field of business procurement; Providing temporary use of online non-downloadable computer software for managing, routing, approving, facilitating, processing, and verifying global business payments to suppliers and vendors; Providing temporary use of online non-downloadable computer software for tracking and reconciling vendor and supplier payments and linking business payment transactions to procurement workflows; Providing temporary use of online non-downloadable computer software for managing, handling, reviewing, and validating vendor and supplier onboarding, approval workflows, invoices, and business purchase orders; Providing temporary use of online non-downloadable computer software for managing, routing, and automating business intake requests and routing approval tasks across compliance, customer operations, information technology, finance, legal, human resources, and security departments; Providing temporary use of online non-downloadable computer software for managing sourcing and vendor selection processes, namely, software for creating and issuing requests for proposals and quotes, collecting and comparing supplier and vendor responses, scoring supplier and vendor submissions, and facilitating sourcing and vendor decisions; Providing temporary use of online non-downloadable computer software for synchronizing data between enterprise applications and generating reports relating to workflow status and business operations; Providing temporary use of on-line non-downloadable software development tools for building and customizing software applications, and creating, deploying, and managing autonomous or semi-autonomous software agents; none of the foregoing for use in consumer credit or consumer installment plan payment services or software.
